FOODSERVICE

FOOD IS ONE OF THE KEYS FOR PLANET SUSTAINABILITY

Climate change, overpopulation, diminishing biodiversity, and natural resources, all these factors have an impact on the players in the agriculture ecosystem. In this context, feeding the world in a sustainable way represents a major challenge for the entire agri-food sector. That is why everything we do follows this thinking: the production techniques we use, the innovation we bring every year, the quality of our products, and the creativity of our recipes all have sustainability in mind. Plus, our North American facilities maintain all the required food safety certifications.

PLANET

We have a long history of supporting sustainable and diversified agriculture, and we continuously research new ways of growing, processing, and selling products to preserve the environment.

FOOD

We strive everyday to make wholesome vegetables accessible to everyone and to promote tastier, healthier food.

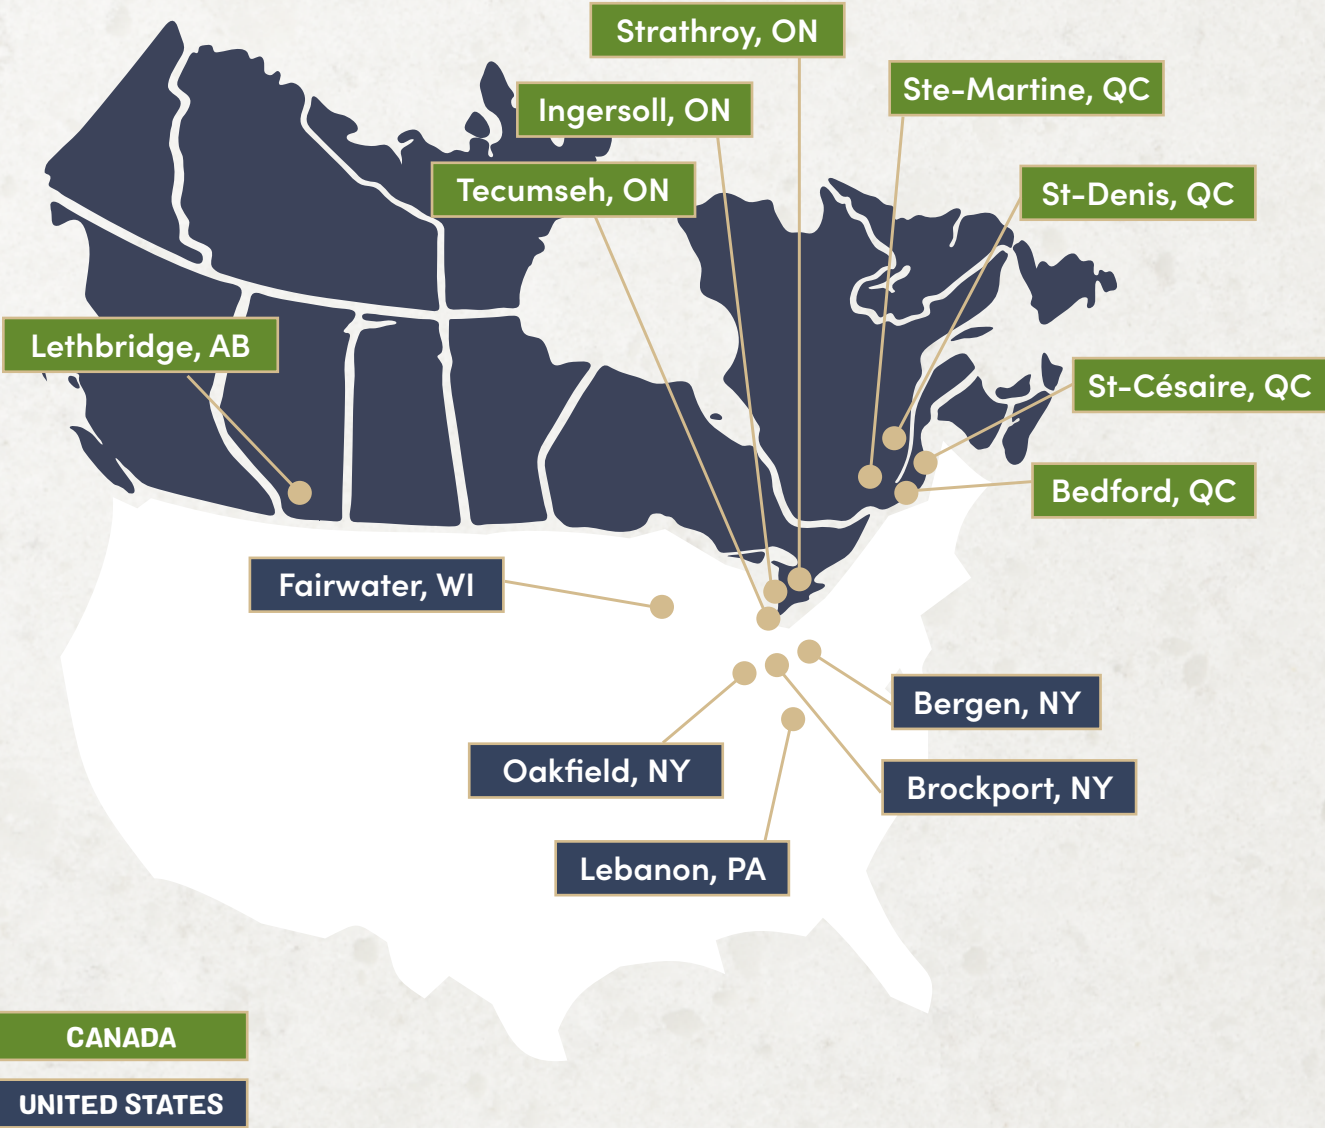

PEOPLE

We're committed to giving employees the opportunity to make a positive impact on the business, on the people around them and on the planet.

WELL-ESTABLISHED IN NORTH AMERICA

With a strong North American presence, our company is an undisputed leader in processed vegetables. We have more than 3,000 employees and work with over 800 producers who grow and prepare vegetables for 8 plants in Canada and 5 in the US.
